► **Moving:**

Joystick up:

Player jumps. If he is the gyroscope, he will transform back to normal again.

Joystick down:

Player ducks away, e.g. from enemies.

Joystick down and press space:(or Amiga:Joystick down and press second firebutton.)

The player will transform into a gyroscope. While in this state the player is invincible and will destroy enemies on touch. The gyroscope spins automatically, and can only be directed to move left or right with the joystick. This shape also allows you to pass through narrow corridors. The player may transform into a gyroscope 3 times in every life.

Pressing firebutton briefly

► **Fire:**

Pressing the fire button briefly: Player fires. If you have already collected the multiple shot or the laser, the according weapon will be used. The multiple shot can be extended in up to two degrees by collecting the right symbols.

In the first degree (basic equipment) the player fires 9 horizontal shots. In the second degree 3 salvos are fired simultaneously: 3 shots in a 30-degree angle upwards, 3 shots horizontal and 3 shots in a 30 degree angle downwards.

The third degree resembles the second, except that the angle changes to 45 degrees.

The laser fires horizontally, and can be extended by gathering up the corresponding symbols. Its length extends from an eighth to half penetration rate, making it very effective when fighting against several enemies simultaneously.

Joystick down while holding the firebutton

► **Activate a Mine:**

Joystick down while holding the firebutton:The player activates a mine. The mine is placed in the ground and explodes shortly afterwards. Various enemies walking the ground can be dealt with in this manner.

Holding firebutton

► *Activate a flash:*

Holding firebutton The player can activate a flash of lightning and may direct it (as long as the firebutton is held), by moving the joystick left (lightning rotates anti-clockwise).

The lightning can take on different lengths. At the beginning of the game it stretches over half the width of the screen. By gathering up extras it can be extended to stretch over the whole width of the screen.

► *Pressing SPACE:*
